

ToolManagerIQ™

Intelligent Tool Manager
within GibbsCAM

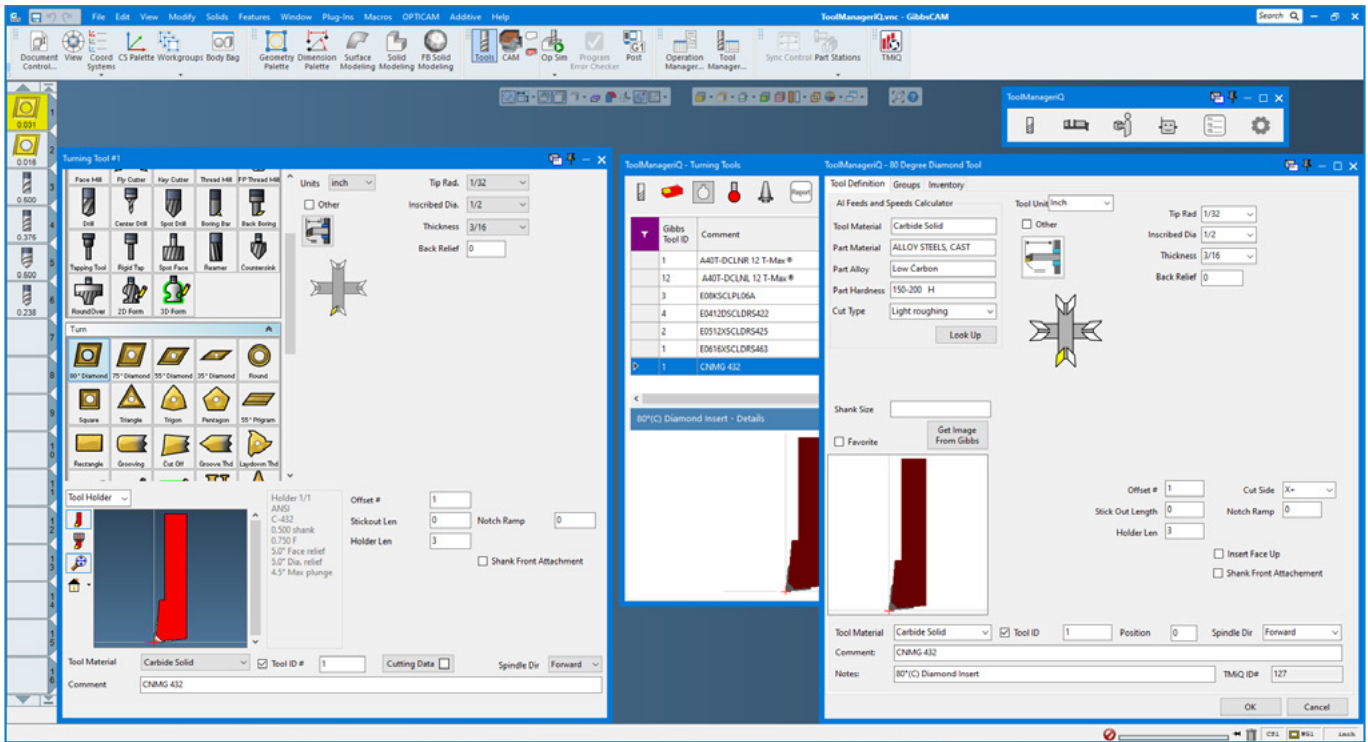

Your Centralized Tool Management Hub

Stay organized, reduce downtime, and improve tool tracking across your entire operation

Simplify your workflow and save valuable time with a solution built for efficiency. With ToolManagerIQ™, you can view all your intermediate tooling data efficiently within the GibbsCAM interface. The robust SQL database organizes everything:

- Cutting tools and tool holders for milling and turning operations
- Tool assemblies and fixture models
- Supplier details and inventory management
- ERP system support
- Intuitive interface for a smooth user experience
- Imperial & Metric support
- Language support includes English, French, Swedish, Finnish, Czech, German, Spanish, and Japanese.

ToolManagerIQ™ is designed with the familiar GibbsCAM interface to fit right into your workflow.

Meet Fritz AI –
Your Smart CNC Companion

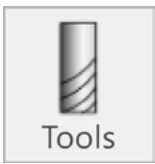

Enhance your GibbsCAM experience with Fritz AI, the newest addition to ToolManagerIQ. Fritz provides instant, precise answers to your questions, all within the GibbsCAM environment—no need to switch tools or interrupt your workflow.

New features for 2025 include a speed and feed calculation that can be performed by Fritz. With Fritz AI, you can work smarter, faster, and more confidently.

*Multifunction indexable drill and intermediate tooling not supported yet.

Experience the next generation of CNC efficiency with ToolManagerIQ™ v4.0

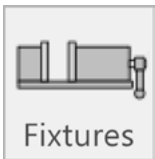

Seamless tool handler with barcode support

Flexible TDM includes tool holders and holder classes that apply to specific tool holders.

TMiQ's ToolID seamlessly works with barcode scanning equipment to input data quickly. Plus, individually customize the tool section.

Name	Bar Code
REAMER D7	[Barcode]
CHAMFER TOOL D12	[Barcode]
ROUND OVER D12	[Barcode]
12.7MM INSERT DRILL	[Barcode]
LOLLIPOP D12	[Barcode]
ROUGH END MILL D6	[Barcode]
DOVETAIL	[Barcode]
BARREL MILL	[Barcode]

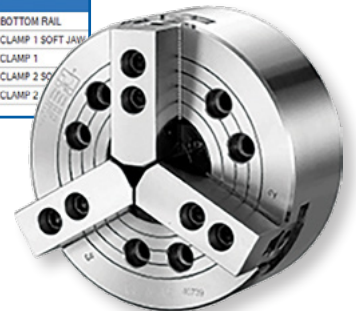

Fixture data

The TDM fixture data center, with editable fixture assembly input, allows for auto and manual customization.

asily manage fixtures with auto and manual customization. Check and edit details, including visual identification of every fixture in the toolbox.

Fixture Name
3 JAW CHUCK
RADIUS 60MM - BOTTOM RAIL
RADIUS 60MM - CLAMP 1 SOFT JAW
RADIUS 60MM - CLAMP 1
RADIUS 60MM - CLAMP 2 SO
RADIUS 60MM - CLAMP 2
6" VISE

Supplier data

Manage tool inventory and supplier information locally.

Stay on top of supplier details and stay on-track with day-to-day demands of tool management. Quickly replace and update your tool crib conveniently from a single location.

The virtual tool crib

ToolManagerIQ's ROI is immediate. Whether you manage hundreds or thousands of tools, your team can quickly and easily access any tool, get detailed information, including its location and supplier details.

Eliminates repetitive tasks that slow you down. No endless searches through files, folders, and windows It's all captured right here, in TMiQ's virtual tool crib.

Benefits

- Instantly identifies tools assigned to specific CNC machines
- Shows what's available and in stock at a glance
- No need for extensive retraining
- Effortlessly share best practices across teams

GibbsCAM 2025 Intermediate Tooling List & Tool Report

Centralized tool library

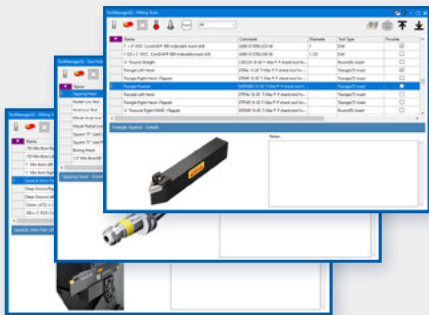

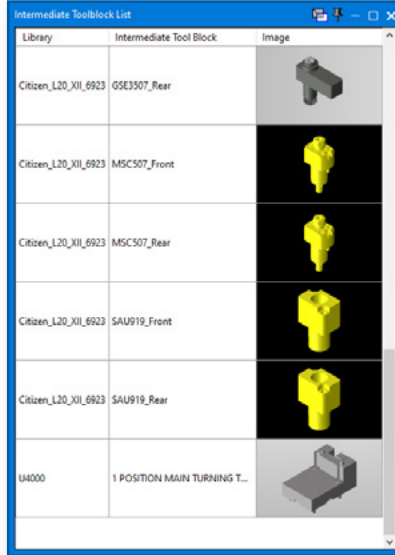

Import and export tools, holders, and fixtures. TMIQ universally updates the entire TDM-SQL database.

Customized tool data

Add tools manually and still edit automated imports.

Universal data capture

Team Members can update, add notes, or edit tool details as required, knowing the information is managed and shared in real-time and universally accessible.

100+ Pre-loaded tools

Whether your team is using the stand-alone, or GibbsCAM version, they're ready to go.

TMIQ supports better with over 100 preloaded tools, all of which encompass metric and imperial milling and turning tools.
